EXPERIENCE

Machine Learning Intern DevelopersHub Corporation	<i>Jun 2025 – Jul 2025</i>
	<i>Remote</i>
<ul style="list-style-type: none">Developed RAG-based conversational AI agents for medical and mental health diagnostics.Fine-tuned LLMs with HuggingFace Trainer API and constructed Python scripts for real-time user interaction.Executed end-to-end data pipelines, including Exploratory Data Analysis (EDA) and data cleaning, on clinical datasets to identify key features for heart disease classification.Trained regression models for house/stock price forecasting, implementing time-series analysis on preprocessed metrics.	
Web Developer Intern Premier NX	<i>Jun 2025 – Aug 2025</i>
<ul style="list-style-type: none">Architected responsive, user-friendly frontend interfaces for an academic portal utilising PHP Laravel.Implemented full-stack CRUD functionality, ensuring real-time data synchronisation with a MySQL backend.	<i>Lahore, Pakistan On-site</i>
Python Developer Intern Softsines	<i>May 2025 – Jul 2025</i>
<ul style="list-style-type: none">Completed comprehensive data science training, mastering Pandas and NumPy for data preprocessing.	<i>Remote</i>

EDUCATION

Bachelor of Science (B.S.) in Computer Science FAST National University of Computer & Emerging Sciences	<i>Aug 2027</i>
	<i>Islamabad, Pakistan</i>

- Coursework: Data Structures, Database Systems, Design & Analysis of Algorithms, Object-Oriented Programming, Computer Networks, Artificial Intelligence, Web Programming, Software Design & Analysis, Information Security

PROJECTS

Game-Playing Agent for TORCS

- Automated a car racing simulation using PyTorch and scikit-learn, implementing a Random Forest model to achieve autonomous driving based on telemetric data.
- Trained the model on sensor-based input to optimise speed and steering in dynamic racing environments.
- Implemented real-time decision-making and performance evaluation to enhance accuracy and responsiveness.

Ultimate Tic-Tac-Toe

- Developed a player vs. AI Tic-Tac-Toe game in Python, incorporating the Minimax Algorithm with Alpha-Beta Pruning for efficient decision-making.
- Applied advanced Constraint Satisfaction Problem (CSP) techniques to enforce game rules and logic.
- Refined user experience through an interactive Tkinter GUI, enhancing gameplay realism and competitive challenge.

XONIX

- Programmed a GUI-based arcade game with single-player and two-player modes utilising C++ and SFML.
- Implemented algorithms for player movement, dynamic territory capturing, and enemy AI in single-player mode.
- Optimised user experience with responsive controls, real-time scoring, and engaging visual feedback.

Hospital Management System

- Built a full-stack HMS using React for the frontend and Node.js with MongoDB for the backend.
- Developed comprehensive modules for patient management, appointments, and medical records.
- Implemented secure user authentication and role-based access control using JSON Web Tokens (JWT).

Personal Website

- Designed a personal web portfolio with HTML, CSS, and JavaScript. Hosted via GitHub Pages.
- Integrated external pull requests to enhance the website's interface and cross-device compatibility.

SKILLS

Web Development Tools: HTML, CSS, JavaScript, React, Node.js, MongoDB, PHP, Laravel

Game Development Tools: Unity, SFML (Simple & Fast Multimedia Library)

Programming Languages: C++, Python, Java, SQL (MySQL), x86 Assembly

CERTIFICATIONS

Google AI Essentials Specialisation – Google • Introduction to Artificial Intelligence – University of Illinois Urbana-Champaign • Introduction to Generative AI for Developers with Copilot – Microsoft
